This starts with two well-established mineral UV-filters: **TEGO® Sun T 805**, a hydrophobically coated Titanium Dioxide for broad UV-B and partly UV-A protection. The entire UV-A spectrum is covered by a combination with **TEGO® Sun Z 800**, a coated Zinc Oxide.

To meet today’s requirements for a modern facial sunscreen the Ecocert approved, plant extract **TEGO® Turmerone** can be incorporated. “The golden spice of India” has significant anti-oxidant activity and decreases wrinkle depth.

Lactil® is a blend of humectants supplementing the natural moisturizing factor of human skin. It can be used as moisturizing component in sunscreens as well as after sun applications. *In vivo* studies have demonstrated both a short term and a long term moisturizing effect.

Improving the conditions of photodamaged dermis, **Phytosphingosine SLC** is an excellent active ingredient for after sun applications. This product is a combination of naturally occurring, skin-identical Phytosphingosine with salicylic acid.

Company Information

Evonik Industries is the creative industrial group from Germany which operates in three business areas: Chemicals, Energy and Real Estate. Evonik is a global leader in specialty chemicals, an expert in power generation from hard coal and renewable energies, and one of the largest private residential real estate companies in Germany. Our strengths are creativity, specialization, continuous self-renewal, and reliability. Evonik is active in over 100 countries around the world. In its fiscal year 2008 about 41,000 employees generated sales of about €15.9 billion and an operating profit EBITDA of about €2.2 billion.
